

# C-Target 3

## Marine Target

C-Targets are a range of lightweight, easily deployed, highly manoeuvrable marine targets used for naval gunnery training, weapons testing and ship command and control assessments.

The smallest in the range, the C-Target 3 features a novel two part hull design for ease of storage and transportation. A single point hoop lift and foam fenders allow for easy launch, recovery and handling.

### KEY FEATURES

- Highly survivable and repairable aluminium hull
- Outboard engine and electronics recessed in protected area that can be fitted with ballistic panels
- Single point lift hoop for easy launch and recovery
- Easily transported with two part hull
- Remote operation through direct control or programmable console
- Can operate individually or as part of a swarm
- Operated using ASView-T Control System
- Can be customised to resemble specific craft and configured as a low cost ASV with the addition of upgraded cameras and control functionality

### APPLICATIONS

- Naval gunnery training
- Weapons and platform trials
- Ship command and control and pre-deployment assessments
- Surface-surface and air-surface applications

We are passionate about developing autonomous maritime vessels. Since 2008 we have pioneered the development of unmanned technology. We have designed and built more than 80 vessels which are now deployed all over the world in the service of the oil & gas, scientific and defence sectors. We are the sector's most experienced, tested and successful developer. We employ a world class team to deliver a safe, efficient, and reliable solution.

# C-Target 3

## TECHNICAL SPECIFICATIONS

C-Target 3	
Length	3.5m
Beam	1.4m
Height	1.3m
Weight	~ 325kg
Propulsion	30hp
Speed	25 knots
Fuel Capacity	40 litres
Control	ASView-T direct or automated control
Communications	UHF, 10km+
Options	Single boat or multi-boat, visual, radar and thermal enhancements, real time video link and missed distance indicators (MDI).
